Title

B I H | ⚡ ≡ ≡ | 🔍 📸 | 🌐 🗃 ✎ | ?

In here either display the note or media the user uploaded. Let them rename it by clicking on "Title" above and save in the bottom right corner. If this is a note, idk if it should be a markdown file, a plain txt file or maybe some sort of rich text editor, leaning towards markdown for nice features but not too many features like a rich text editor. Anyway if it is a note, and you are editing, there will be a text editor toolbar up top for bolding and whatnot. If not editing or not a text note thingy, there would be not text editor toolbar above. Some quick research on text editors, there's this one: <https://github.com/lonaru/easy-markdown-editor> which seems nice and simple but I am only a designer so idk what to really look for

Also if this isn't in editing mode, the save icon at the bottom right will be a pencil so you click that to go in editing mode
